- Holding the meter at the subject or in the scene
- Reading the needle position
- Adjusting camera settings accordingly

Step-by-step Usage

- Incident Mode: Place the diffuser dome over the sensor, aim at the light source or subject, and press the meter's button to get a reading.
- Reflected Mode: Hold the meter at the subject or point it toward the scene, then note the needle's position relative to the scale.

Interpreting the Readings

The needle aligns with the recommended exposure setting, indicating the combination of shutter speed and aperture needed for correct exposure. The photographer then adjusts their camera settings to match the meter's recommendation.

Advantages of Manual Operation

- Greater control over exposure settings
- Better understanding of lighting conditions
- No reliance on batteries or digital screens that can fail

Challenges
